

ALPHA UI / UX

Customer Journey

1. User Clicks "Try It Out"
2. User inputs Name
3. User inputs Phone Number
4. User consents to Terms of Service & Marketing
5. "Now let's create your twinnie"
6. Take photo of yourself in front A Pose (with example)
7. Take photo of yourself in side A Pose (with example)
8. Take Spinning Video of yourself
9. Enter Height, Weight, Gender
10. Progress bar for Twinnie Creation
11. Shopping Area Opens - Twinnie on right 75% of the screen for desktop, "Shop" on left 25% of screen
12. "Shop" has inventory of T Shirt x 4 Size, Sweater x 4 sizes, Pants x 4 sizes, Shorts x 4 sizes, Long Sleeve T Shirt x 4 sizes.
13. "Shop" first view solely has these buttons: T-Shirt. Pants. Sweater. Shorts. Long Sleeve Shirt.
14. User can open up the size options by clicking on T Shirt. It will then open up S, M, L, XL.
15. User clicks on, for example, "Sweater". Then "L". Large Sweater gets queued and tried on the avatar, and shown in the viewer.
16. The user can spin full 360 around the avatar, by swiping below the avatar's body.
17. The user can zoom in and zoom out (by pinch)
18. The user can interact with the cloth, by swiping, touching the cloth.
19. The user then clicks on "Pants". "M". Sweater gets removed, pants get queued and tried onto the avatar. Same process happens again.
20. User can at any point click 'twinnie' in the top left corner, which will bring him back to the original home page.
21. Manually send Post Eval Survey
22. Twinnie should save the users account, with the Twinnie that was created, as well as store what has been tried on

Generalities

- The process should be very guiding, and go page by page. For example - a page with Name _____, then it "slides" to a new page that says Phone Number _____.
- We should use circles / soft rounded rectangles as buttons, rather than rigid squares. This is to keep the product looking friendly rather than rigid
- Site should look modern and sleek
